

LANGUAGE ARTS – Course Descriptions

Ninth Grade Literature/Composition (CP or Honors) Grade Level: 9 Required Ninth Grade Literature/Composition focuses on a study of literary genres, with students developing the ability to support interpretations from texts. Students review the writing process and write in all formats, but they concentrate on technical writing.

Students choosing Honors are expected to complete summer reading requirements. Also, honors English students should be self-motivated and willing to spend additional time on reading and writing outside of class.
End of Course exam required.

Tenth Grade Literature/Composition (CP or Honors) Grade Level: 10 Required Tenth Grade Literature/Composition focuses on the study of literary themes. Students practice all modes of writing but concentrate on persuasive writing. Instruction in conventions takes place in the context of reading, writing, and speaking. Students continue listening and viewing critically and develop further skill in written and oral communication.

Students choosing Honors are expected to complete summer reading requirements. Also, honors English students should be self-motivated and willing to spend additional time on reading and writing outside of class.

American Literature/Composition (CP or Honors) Grade Level: 11 Required Or AP Language/Composition

In American Literature and Composition, students develop understanding of chronological context and relevance of period structures and how they affect meaning in literature. They practice all modes of writing but focus on expository writing. Students study Standard English conventions, learning that conventions are the “good manners” of writing and speaking.

Students choosing Honors or AP are expected to complete summer reading requirements. Also, honors English students should be self-motivated and willing to spend additional time on reading and writing outside of class.

The End of Course exam is required for American Literature, but NOT AP Language.

British Literature/Composition Grade Level: 12 Required Or AP Literature/Composition Honors

The objectives of this course are to develop understanding of chronological context and relevance of period structures in British and Commonwealth literature. Students practice all modes of writing but concentrate on expository writing. They improve their use of conventions in context and become more proficient in analyzing and preparing media presentations.

Students choosing AP are expected to complete summer reading requirements. Also, honors English students should be self-motivated and willing to spend additional time on reading and writing outside of class. Passing the AP exam *may* earn college credit.

Honors and AP English Courses

Honors English courses are rigorous. Students are required to produce research assignments, projects, and several performance tasks in order to receive credit for the course. Outside reading is required including summer reading. Homework/class work includes written assignments, note taking, quizzes, worksheets, peer editing teams, individual and team presentations, skits, SAT vocabulary preparation, essay construction, library research, grammar review, SSR daily reading, etc. Participating in daily class discussions is expected and required. The curriculum covers a variety of literary and writing genres. Additional studies include vocabulary, grammar, presentation skills, the writing process, research skills, outside reading, and answering open-ended questions.

English Course	Summer Reading for Honors English
9 th grade Honors Lit/Comp	<ol style="list-style-type: none"> 1. <i>The House on Mango Street</i> by Sandra Cisneros 2. <i>A Separate Peace</i> by John Knowles
10 th grade Honors Lit/Comp	<ol style="list-style-type: none"> 1. <i>Oedipus Rex/King</i> by Sophocles 2. <i>Animal Farm</i> by George Orwell
11 th grade Honors American Lit.	<ol style="list-style-type: none"> 1. <i>The Great Gatsby</i> by F. Scott Fitzgerald 2. <i>A Lesson Before Dying</i> by Ernest Gaines.
11 th grade AP Language	<ol style="list-style-type: none"> 1. <i>The Great Gatsby</i> by F. Scott Fitzgerald 2. <i>Into the Wild</i> by Jack Krakauer
12 th grade AP Literature	<p>Please select <u>TWO</u> of the following by Shakespeare:</p> <ol style="list-style-type: none"> 1. <i>King Lear</i> 2. <i>Julius Caesar</i> 3. <i>Twelfth Night</i> 4. <i>Hamlet</i> 5. <i>Macbeth</i>

Please visit the RHS website for additional information regarding Summer Reading.

Journalism I/II/III/IV Grade Level: 9-12 Elective This course focuses on journalistic writing through analysis of newspapers, yearbooks, literary magazines, and broadcast journalism publications. A concentration on the following components of journalistic writing is critical: influence, purpose, structure, and diction. Reading, writing, and critical thinking are key components as students explore the power and influence of journalism. Students will participate in news gathering, the study of ethics, and the aspects of copywriting, editing, and revising and will study the ethics of journalism.

MATHEMATICS – Course Descriptions

Algebra I (CP or Honors) Grade Level: 9 Required This is the first in a sequence of three high school mathematics courses designed to ensure career and college readiness. The course represents a discrete study of algebra with correlated statistics application. **End of Course exam required.**

Foundations of Algebra Grade Level: 9 Remedial Option FOA is a first year high school mathematics course option for students who have completed mathematics in grades 6 – 8 yet need substantial support to bolster success in high school mathematics. The course is aimed at students who have reported low standardized test performance in prior grades and/or have demonstrated significant difficulties in previous

mathematics classes. There are specific eligibility requirements for enrollment in this course.

Geometry (CP or Honors) Grade Level: 10 Required Geometry is the second course in a sequence of three required high school courses designed to ensure career and college readiness. The course represents a discrete study of geometry with correlated statistics applications.

Algebra II (CP or Honors) Grade Level: 11 Required Algebra II is the third course in a sequence of three high school courses designed to ensure career and college readiness. In this class students pull together and apply the accumulation of learning they have from their previous math courses.

Math Support Classes Grade Level: 9-11 Remedial Option Support classes are offered as an additional elective course to provide additional support and instruction in the first three math courses, Algebra I, Geometry, and Advanced Algebra. The intent of math support is to give extra time for students to meet the standards of more rigorous math courses and utilize a variety of strategies to help students build a stronger foundation for success in their current and future mathematics courses. Support classes are strongly recommended for students who struggle with math.

Pre-Calculus (CP or Honors) Grade Level: 12 4th Math Option Pre-calculus is a fourth mathematics course option which focuses on standards to prepare a student for a more intense study of mathematics. It helps prepare a student for calculus and other college level math courses.

Advanced Mathematical Decision Making Grade Level: 12 4th Math Option AMDM is a fourth course option designed to offer further experiences with statistical information and summaries, methods of design and conducting statistical studies, an opportunity to analyze various processes, modeling of data, basic financial decisions and use network models for making decisions.

College Readiness Math Grade Level: 12 4th Math Option CRM is a fourth mathematics course option for students who have completed Algebra II, but are still struggling with high school mathematics standards essential for success in first year post-secondary mathematics courses required for non-STEM majors. The course is designed to serve as a bridge for high school students who will enroll in non-STEM post-secondary study.

Mathematics of Finance Grade Level: 12 4th Math Option This course concentrates on the math necessary to understand and make informed decisions related to personal finance. The math in this course will be based on many topics in prior courses; however, the specific applications will extend the student's understanding of the use of these topics. ***This course is not accepted for the 4th math credit for students applying to 4-yr colleges.***

AP Calculus AB Grade Level: 11-12 4th Math Option AP Calculus AB is a college level course and conforms to College Board topics for the Advanced Placement Calculus AB Exam. It provides a more challenging approach than the regular Calculus curriculum. Passing the AP exam *may* earn college credit.

AP Statistics Grade Level: 11-12 4th Math Option AP Statistics is a college level course and covers four major themes: exploratory analysis, planning a study, probability, and statistical inference and follows the College Board syllabus for the AP Statistics Exam. Passing the AP exam *may* earn college credit.

Honors and AP Math Courses

Honors math courses are rigorous with high expectations. These courses are designed to prepare students to take AP Calculus and or AP Statistics their senior year. Students who enroll in these classes are expected to be

self-motivated, mature and have a strong work ethic. Emphasis is placed on using the curriculum to develop critical thinking and problem solving skills. These classes are more in-depth than the college prep (CP) math courses. Students are expected to apply concepts learned to different types of situations as well as be able to explain how to problem solve. Homework enables students to independently practice and master the concepts covered in class. Therefore, students are given homework assignments most nights and weekends.

SCIENCE – Course Descriptions

Environmental Science Grade Level: 9 Required Environmental Science integrates the study of many components of our environment, including the human impact on our planet. Some concepts are global; in those cases, interpretation of global data sets from scientific sources is strongly recommended.

Or Honors Physical Science

This course is designed as a survey course of chemistry and physics. Students investigate physical science concepts through experience in laboratories and field work using the processes of inquiry. Students choosing Honors are expected to be self-motivated, well organized, and possess excellent study skills.

Biology (CP or Honors) Grade Level: 10 Required The biology curriculum includes concepts such as the interdependence of organisms, the relationship of matter, energy, and organization in living systems, the behavior of organisms, and biological evolution. Students investigate biological concepts through experience in laboratories and field work using the processes of inquiry. Students choosing Honors are expected to be self-motivated, well organized, and possess excellent study skills. **End of Course exam required.**

Physical Science (CP or Honors) Grade Level: 11-12 Required This course is designed as a survey course of chemistry and physics. Students investigate physical science concepts through experience in laboratories and field work using the processes of inquiry. Students choosing Honors are expected to be self-motivated, well organized, and possess excellent study skills. **Students who took environmental science in 9th grade are required to take physical science.**

Physics (Honors) Grade Level: 11-12 4th Science Option This curriculum includes concepts such as interactions of matter and energy, velocity, acceleration, force, energy, momentum, and charge. Students investigate physics concepts through experience in laboratories and field work using the processes of inquiry

Chemistry (College Prep or Honors) Grade Level: 11-12 Required also 4th Science Option Chemistry is a course which includes the basic concepts of chemistry: Balanced Chemical Reactions, IUPAC Chemical Formulas, Law of Conservation of Matter, Stoichiometry (moles), Atomic Theory, Periodic Properties, Kinetic-Molecular Theory, Kinetics, and Solutions. Related lab experiences emphasize science process skills and include student-centered and inquiry-based activities.

Students choosing Honors are expected to be self-motivated, well organized, and possess excellent study skills. **Students who took honors physical science are required to take chemistry.**

Human Anatomy and Physiology (CP or Honors) Grade Level: 11-12 4th Science Option In this course the structures and functions of the systems of the human body are studied in great detail. Most of the concepts are concentrated in the physiological function of the organ systems. This course is recommended for students who plan to enter training programs for healthcare science or forensic science careers. Students choosing Honors are expected to be self-motivated, well organized, and possess excellent study skills.

AP Biology Grade Level: 11-12 4th Science Option AP Biology is a college level course. This course is for

students who are interested in majoring in a science or pre-medical field. This course focuses on the anatomy and physiology of humans, animals, and plants as well as ecology. Course work will include the required AP labs as well as other laboratory experiments and exercises.

Students interested in this course must take chemistry first. Most activities will emphasize the material on the AP Biology Exam. Passing the AP exam *may* earn college credit.

AP Environmental Science Grade Level: 11-12 4th Science Option AP Environmental Science is designed to provide students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems both natural and human-made, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving and/or preventing them. Passing the AP exam *may* earn college credit.

AP Physics Grade Level: 11-12 4th Science Option AP Physics 1 is an algebra-based, introductory college-level physics course that explores topics such as Newtonian mechanics (including rotational motion); work, energy, and power; mechanical waves and sound; and introductory, simple circuits. Through inquiry-based learning, students will develop scientific critical thinking and reasoning skills. Most activities will emphasize the material on the AP Physics Exam. Passing the AP exam *may* earn college credit.

Honors and AP Science Courses

Honors science courses are designed to be a rigorous and in-depth study of the subject. Students are expected to be self-motivated and conduct themselves in a mature manner during lab and class discussion. Students learn the skills and processes needed to complete scientific investigations. Student grades will include quizzes, tests, lab reports, homework, and projects. Formal lab reports are to be prepared following the standard lab report format / scoring rubric distributed in class. Homework will be given some nights and weekends. It is important to complete the homework to master the concepts taught. Students are responsible for reviewing the daily outcomes every night. Each unit will include short laboratory activities to explore the concepts covered and longer laboratory challenges in which students will be asked to apply the knowledge and skills learned during the unit to accomplish a specific task. By the conclusion of each course, the student is expected to meet the requirements of the Georgia State Standards.

SOCIAL STUDIES – Course Descriptions

World History (CP, Honors, or AP) Grade Level: 9 Required World History provides an in-depth study of world cultures, major ideas, religions, inventions, and people and events of history from the rise of civilization to the present. This includes a study of famous people who have helped advance civilization throughout history. Important events concerning advancements in music, art, science, and architecture are part of the curriculum.

AP courses will exceed standards by utilizing readings, research, investigative and creative skills. Critical thinking and analyses will be exemplified through historical essay writing.

American Government (CP, Honors, or AP) Grade Level: 10 Required Course focuses on basic concepts and principles of the American political system and includes the structure and function of the American system of government, the roles and responsibilities of citizen participation in the political process, and the relationship of the individual to the law and legal system.

AP American Government is a rigorous course that teaches students how to apply the themes in American civic

life to practical everyday situations. Honors courses will exceed standards by utilizing readings, research, investigative and creative skills.

United States History Grade Level: 11 Required Or AP United States History

United States History is a study of our nation from the discovery of the New World to the present with an emphasis on the social, economic, and political changes which have shaped the United States into a world power. AP US History is a rigorous course that conforms to College Board topics for the AP United States History examination. Passing the AP exam *may* earn college credit. **The End of Course exam is required for US History, but NOT AP US History.**

Economics Grade Level: 12 Required Or AP Macroeconomics

Economics is the study of how people satisfy seemingly unlimited and competing wants with the careful use of scarce resources. It includes the study of the behavior and decision making by small units such as individuals and firms and of the economy as a whole and decision making by large units such as governments and unions. The consumer's role in the consumption and production of goods and services is also studied. AP Macroeconomics

is a rigorous course that conforms to College Board topics for the AP Macroeconomics examination. Passing the AP exam *may* earn college credit. **The End of Course exam is required for Economics, but NOT AP Macroeconomics.**

Honors and AP Social Studies Courses

Honors social studies courses are rigorous courses. The courses are designed to provide students with the analytic skills and factual knowledge necessary to deal critically with the problems and materials in social studies. The course sequence prepares students for post-secondary course work in history by setting standards equivalent to those made by full-year introductory college courses. Students will learn to assess historical materials and their relevance to given interpretive problems, reliability, and importance and to weigh the evidence and interpretations presented in historical scholarship. Students study issues and events relating to both race and environment as a unifying concept throughout the course. Honors social studies courses will help students develop the skills necessary to arrive at conclusions on the basis of an informed judgment and to present reasons and evidence clearly and persuasively through oral discussions and in essay format. Students will be expected to complete extensive reading assignments and devote time to homework assignments and projects. Time will need to be set aside each night for studying or work. Students in honors social studies courses will be held to high expectations and mature responsibilities.

CAREER TECHNICAL AGRICULTURAL EDUCATION (CTAE) – Course Descriptions

Career Technical pathways consist of a required three courses plus one additional course in that same career cluster. Some of the career pathways have been industry certified by the National Occupational Competency Testing Institute. Student certification will be based upon the student's score on an industry exam taken after completing all the coursework. Pathways are intended to be taken in order.

From Here to Career Grade Level: 9 Required The course is designed for students as a gateway to high school and will lead them as they identify a high school graduation plan, post-secondary options, and eventually a possible best-fit career. Emphasis is placed on identifying and developing personal aptitudes that

will benefit them throughout their educational and career journey. Students will explore how these natural strengths can be leveraged throughout life. Employability skills are integrated into activities, tasks, and projects throughout the course to demonstrate the skills required by business and industry. Competencies in the co-curricular student organization, Future Business Leaders of America (FBLA), are integral components of both the employability skills standards and content standards for

this course. The intention of this course is to prepare students to be successful both personally and professionally in school and throughout their careers. Students will not only understand the concepts, but apply their knowledge to situations and defend their actions/decisions/choices through the knowledge and skills acquired in this course. From Here to Career satisfies requirements for the Introduction to Career Competencies class and is the first class in the Workforce Ready Pathway that will be offered through the College and Career Academy.

Business and Computer Science Pathways Grade Level: 9-12 Elective The Business and Computer Science Pathway prepares students with computer skills for future college and career plans. Cluster skills mastered include planning, organizing, directing, and evaluating as well as owning and operating a successful business. RHS offers two pathways in this field.

Business and Technology

1. Introduction to Business and Technology (IBT)
2. Business and Technology
3. Business Communications

Entrepreneurship

1. Introduction to Business and Technology (IBT)
2. Legal Environment of Business
3. Entrepreneurship

Programming

1. Introduction to Digital Technology (IDT)
2. Computer Science Principles **OR** AP Computer Science
3. Programming, Games, Apps, and Society

Game Design

1. Introduction to Digital Technology (IDT)
2. Computer Science Principles **OR** AP Computer Science
3. Game Design: Animation and Simulation

Agriculture Pathways Grade Level: 9-12 Elective The Agriculture Pathway includes the production, processing, marketing, financing, distribution, and development of agricultural commodities and resources. These commodities include food, fiber, wood products, natural resources, horticulture, and other plant and animal products/resources. RHS offers two pathways in this field.

Food Animal Systems

1. Basic Agricultural Science
2. Animal Science and Biotechnology
3. Agricultural Animal Production and Management

Agriscience Systems

1. Basic Agricultural Science
2. Animal Science and Biotechnology
3. Plant Science and Biotechnology

Audio-Video Technology Pathway Grade Level: 9-12 Elective

The Audio-Visual Technology and Film Career Pathway prepares students for employment or entry into a postsecondary education program in the audio and video technology career field. Topics covered may include: terminology, safety, basic equipment, script writing, production teams, production and programming, lighting, recording and editing, and studio production, and professional ethics. Students will also experience Planning, Writing, Directing and Editing a Production; Field Equipment Functions; Operational Set-Up and Maintenance; Advanced Editing Operations; Studio Productions; Performance; Audio/Video Control Systems; Production Graphics; Career Opportunities.

1. Audio-Video Tech Film I
2. Audio-Video Tech Film II
3. Audio-Video Tech Film III

Carpentry Pathway Grade Level: 9-12 Elective The Construction Pathway includes studies in designing, planning, managing, and building structures.

1. Industry Fundamentals and Occupational Safety
2. Introduction to Construction
3. Carpentry

Criminal Investigations Pathway Grade Level: 9-12 Elective The Law, Public Safety, Corrections, & Security Career Cluster prepares individuals for employment relating to emergency and fire services, legal services, protective services, and homeland security.

Law Enforcement Services / Criminal Investigations

1. Introduction to Law, Public Safety, Corrections, and Security
2. Criminal Justice Essentials
3. Criminal Investigations

Law Enforcement Services / Forensic Science

1. Introduction to Law, Public Safety, Corrections, and Security
2. Criminal Justice Essentials
3. Forensic Science

Early Childhood Care and Education Pathway Grade Level: 9-12 Elective The Early Childhood Care and Education Pathway prepares students for employment in early childhood education and services by addressing the knowledge, skills, attitudes and behaviors associated with supporting and promoting optimal growth and development of infants and children.

Early Childhood Care and Education

1. Early Childhood Education I

2. Early Childhood Education II
3. Early Childhood Education III

Graphic Communication and Design Pathways Grade Level: 9-12 Elective The Graphics Pathway includes designing, producing, exhibiting, performing, writing, and publishing multimedia content. RHS offers two pathways in this field.

Graphic Communications

1. Introduction to Graphics and Design
2. Graphic Design and Production
3. Advanced Graphic Output Processes

Graphic Design

1. Introduction to Graphics and Design
2. Graphic Design and Production
3. Advanced Graphic Design

Healthcare Science Education Pathway Grade Level: 9-12 Elective The Health Science Career Cluster includes planning, managing, and providing services in therapeutics, diagnostics, health informatics, support areas, and biotechnology research and development. It is possible to complete two pathways in this pathway by successfully completing the Certified Nurse Assistant (C.N.A.) program through Georgia Northwestern Technical College.

Therapeutic Service/Allied Health and Medicine

1. Introduction to Healthcare Science
2. Essentials of Healthcare
3. Allied Health and Medicine

JROTC – Army Grade Level: 9-12 Elective I, II, III, IV, V, VI, VII, VIII

This course includes classroom instruction and laboratory instruction in the history, customs, traditions and purpose of Army JROTC. It contains the development of basic leadership principles, values and attributes. The performance standards in this course are based on the performance standards identified in the curriculum for the US Army JROTC. Students may take three semesters of JROTC to meet the state health/pe requirement. Also, students who complete three semesters of ROTC may receive advanced rank for all branches of the service upon enlistment.

Work Based Learning (WBL) Grade Level: 11-12 Elective Applicants for Work-Based Learning (WBL) encompasses internship (unpaid), cooperative work experience, and apprenticeship. In order to receive credit for WBL, students must complete several assignments a month including journals and time logs. Students must have an approved job to be in the program. Approved jobs may be paid and unpaid jobs and/or internships.

PHYSICAL EDUCATION – Course Descriptions

*Students may only take one course per semester.

Personal Fitness/Health Grade Level: 9 Required Both are taught in one semester. Personal Fitness provides instruction in methods to attain a healthy level of physical fitness. The Health component is designed to help students develop an awareness of safety and healthy lifestyles and methods of dealing with related emergencies. Included in the health component is the drug and alcohol awareness class required by the Georgia Highway Patrol before students are eligible to secure their driver's license. The instruction on human sexuality and AIDS awareness required by the state of Georgia is also part of the curriculum.

Team Sports/Lifetime Sports Grade Level: 10-12 Elective

Course introduces fundamental skills, strategies, and rules associated with team sports such as basketball, volleyball, soccer, softball, baseball, field hockey, and flag football. Class enhances skills in team sports strategies. This course may not be offered every semester.

Weight Training/ Body Sculpting/ Physical Conditioning Grade Level: 9-12 Elective Weight training is a series of courses designed to assist students in the enhancement of their physical strength. The program will augment the strength of particular muscle groups, improve body conditioning, reapportion body measurements, and increase power, coordination, speed and flexibility. Proper weight-lifting techniques and safety measures will be introduced and a planned program of weight training for the individual will be developed and implemented.

FINE ARTS – Course Descriptions

A student may complete a fine arts pathway in fine arts by taking three courses in any one of the following areas: visual arts, theatre, chorus, or band.

Advanced Band (Marching Band) I, II, III, IV Grade Level: 9-12 Elective Advanced Band is offered to students who will participate in marching band. No audition is required; however, previous playing experience is necessary. Certain performances and activities are required including band camp, all rehearsals, field and marching shows, parades, marching festivals and competitions.

Advanced Instrumental Ensemble (Drums) I, II, III, IV Grade Level: 9-12 Elective Percussion Band is offered to students who wish to improve their knowledge of percussion technique. No audition is required; however, previous playing experience is necessary. Certain performances and activities are required including band camp, all rehearsals, field and marching shows, parades, marching festivals and competitions.

Advanced Jazz (Color Guard) I, II, III, IV Grade Level: 9-12 Elective This course is for students who march with the band's color guard. Auditions are required. Certain performances and activities are required including band camp, all rehearsals, field and marching shows, parades, marching festivals and competitions.

Instrumental Orchestra (Spring Concert) I, II, III, IV Grade Level: 9-12 Elective Concert Band is designed for the intermediate band student, playing level III literature. No audition is required; however, previous playing experience is necessary. Certain performances and activities are required including band camp, all rehearsals, field and marching shows, parades, marching festivals and competitions.

Advanced Orchestra (Spring Concert) I, II, III, IV Grade Level: 9-12 Elective Advanced Orchestra is designed for the most advanced band student; auditions are required. Certain performances are required.

Activities that may be required are band camp, all rehearsals, field and marching shows, parades, marching festivals and competitions, district honor band clinic and All-State Band. Emphasis will be placed on individual musicianship and group musicianship through the study of basic fundamental techniques. Emphasis will also be placed on self and group discipline.

Beginning Chorus I, II, III, IV Grade Level: 9-12 Elective Advance Chorus I, II, III, IV

Chorus offers an opportunity for singers with experience singing and reading music to further develop their vocal instruments while rehearsing and performing more advanced choral literature. Students enrolled in this course may also have opportunities for representing the school at regional choral festivals. Concepts covered in this class may include sight-singing, ear training, vocal production, music theory, music history, and

performance techniques. This is a performing group and performances outside of the regular school day may be required.

Musical Theater I, II, III, IV Grade Level: 9-12 Elective Musical Theater focuses on the style and characteristic elements of modern musical theater. This course covers production staging, orchestration, voice and dance; offers an opportunity for team teaching through interdisciplinary collaboration with the chorus, band, art, and technology. This course includes the opportunity for performance.

Art I Grade Level: 9-12 Elective Students will study the fundamentals of design and composition through the techniques of drawing, commercial art, crafts, and printmaking. Media included are pencil, charcoal, markers, pastels, and pen and ink. This course is required as a first course to all other Arts courses.

Art II Grade Level: 10-12 Elective Art II enhances level-one skills in art history, art criticism, aesthetic judgment and studio production, emphasizes and reinforces knowledge and application of the design elements and their relationship to the principles of design, and explores different two-and three-dimensional art media and processes.

Drawing and Painting Grade Level: 10-12 Elective This course introduces drawing and painting techniques and a variety of drawing and painting media, stresses critical analysis of master paintings and drawings of different styles and historical periods; emphasizes problem solving techniques to achieve desired results in personal work.

Sculpture I Grade Level: 10-12 Elective This class focuses on the design and production of 3-D works of art including sculptures, reliefs and ceramics. It introduces tools and procedures used in the production of 3-D work.

Photography Grade Level: 10-12 Elective This course introduces photography as an art form; covers the historical development of photography and photographic design and its cultural influences, emphasizes the basics of exposing and processing photographs, and stresses appropriate processing techniques and safe use of photographic materials and equipment.

WORLD LANGUAGES – Course Descriptions

A student may complete a world language pathway in world language by taking three courses in any one of the following areas.

French I, II, III Grade Level: 10-12 Elective Or German I, II, III (depending on the new World Language Personnel)

Or Spanish I, II, III

Foreign Language courses focus on the four language skills (speaking, understanding, reading, and writing) and understanding of the culture(s) of the people who speak the language. Level I courses assume that the students have minimal or no prior knowledge of the language and culture. Students will focus on communicating about their immediate world and daily life activities, read material on familiar topics, and write short, directed compositions. Level II, III, and IV courses focus on the continued development of communicative competence in the target language and understanding of the culture(s) of the people who speak the language. Four year colleges require two credits in a single foreign language.
